

Katun Performance™ Black and Color Drum Units for use in:

Canon imageRUNNER ADVANCE C5030/C5035/C5235/C5240-series

MFPs

Katun PNs: 46983 and 46985

OEM PNs: 2778B003AA (C-EXV29) and 2779B003AA (C-EXV29)

Reduce costs and improve the long-term profitability of your Canon imageRUNNER ADVANCE C5030-series color machines!

Katun is very pleased to announce the release of the black and color drum units for these popular Canon machine applications – representing an important addition to our growing color product portfolio. These Katun remanufactured drum units offer OEM-equivalent image quality and excellent performance at a significant cost savings versus the OEM drum unit.

Benefits:

◆ Cost-per-Copy Savings and Customer Satisfaction

Dealers choosing this Katun Performance™ drum unit will see significant cost-per-copy savings versus the OEM drum unit for these machines, improving overall profitability without compromising quality or customer satisfaction.

◆ New Components Ensure Exceptional Quality

These Katun Performance™ black and color drum units are remanufactured and assembled with a new OPC drum, drum cleaning blade, and re-set fuse/chip. In addition, each drum unit is produced in accordance with Katun's four-part drum cartridge remanufacturing process, ensuring consistent quality and exceptional performance – at a superior value.

◆ Excellent Long-Term Profit Opportunity

Over the long-term, these Katun Performance™ drum units will provide dealers with a great opportunity to reduce their expenses on a significant portion of their installed machine base.

For more information on how to recycle these units and ensure future product availability, please visit <http://www.katun.com/eu/collecture/> and search for the contact information for your market.

*Actual yield may vary depending on machine applications, machine condition, and usage conditions.

**This Katun Performance™ black drum unit can achieve page yields up to 150,000 when running in “continuous run” mode. As drum yield is determined by number of rotations, shorter copy/print runs during “start/stop” mode, will result in decreased drum yield.
