

# Discover Katun's Growing Line of Eco-Friendly Printers and Multifunctional Devices

**Do you need a reliable, lower cost alternative to buying a new printer?**

Use as a stand-alone device or as a replacement printer in your MPS accounts!

## Katun® Certified Remanufactured Printers and Multifunction Devices

- ▶ Performs and looks like a new printer
- ▶ Stringent remanufacturing processes completed in Europe
- ▶ Cleaning process good as new
- ▶ Boost your profitability when combined with Katun compatible supplies
- ▶ Connect to your network and MPS Program Software straight out the box
- ▶ Two Years Warranty on Hardware

## Katun Access™ Refurbished Printers and Multifunction Devices

- ▶ Residual print value guarantees at least 50,000 prints
- ▶ Avoid purchasing a costly new printer and extend the life of older machines
- ▶ Cleaning process good as new
- ▶ Ideal for Schools, Hospitals, Events and Charity as a small task solution printer
- ▶ Reduce your supplies costs with aftermarket supplies available for older printers
- ▶ Six Months Warranty on Hardware

## Katun and the Environment

The environmental savings from buying a remanufactured or refurbished printer instead of an original one are significant. Katun uses the circular economy model by encouraging its customers to recycle their used cores and cartridges through the company's various collection partners. This not only promotes the optimization of resources in a more sustainable way, but it also provides a larger lifespan to second-hand equipment. Katun takes part in numerous green initiatives and continues to build partnerships that support the protection of the environment and of our planet.
