Katun® Color Toner Cartridges for use in

Konica Minolta 8020/8031 & CF 2002/CF 3102

Digital Copier/Printers

Maximize your supplies profits with Katun Access™ color toners

Benefits:

◆ **Best value**
This Katun Access toner provides the best overall value of any aftermarket toner available today. You get industry-leading performance at aftermarket cost.

◆ **Dependable quality**
Katun Access toner is lab-tested to ensure image quality and yield that is equal to or better than other aftermarket suppliers. It is backed by Katun's warranty and commitment to your needs.

◆ **100% compatible**
These toners have been thoroughly tested to ensure forward and reverse compatibility with Konica Minolta toners. End users can easily install these toner cartridges after OEM toner has been used.

KATUN®

ACCESS™

Machine Background

Konica Minolta 8020-series applications were early generation multi-function color devices that combined the speed of dedicated color engines with the affordability of color capable machines of the time. While these machines were not designed for the demanding requirements of graphics departments or high volume professional printing, they were intended to fill the needs of general and advanced office professionals. With options for scanning originals to PDF and e-mail, or advanced personalization software for sales fliers, these machines enabled affordable color to the general office environment.

These Katun Access brand color toners are high quality products, offering color quality and yields comparable to the OEM, but at a price that re-defines "affordable color."

Buy With Confidence

Katun strives to respect the valid patent rights of others and be an "IP-friendly" corporation. Typically at the initial stage of product development, efforts are taken to promote intellectual property ("IP") compliance before a product is offered for sale. As appropriate, these efforts include an analysis of competitors' intellectual property in the relevant technology area in an effort to prevent any potential infringement of the valid IP rights of other companies.
